

МАТЕМАТИЧЕСКИЙ СБОРНИК
Том 121 (163) (1983), вв. 1-4
MATHEMATICS OF THE USSR-SBORNIK
Volume 49, Numbers 1-2, 1984

AUTHOR INDEX

Andrunakievich, V. A. <i>On completely prime ideals of a ring</i>	285
Aptekarev, A. I. and Nikiishin, E. M. <i>The scattering problem for a discrete Sturm-Liouville operator</i>	325
Arsen'ev, A. A. <i>On invariant measures for classical dynamical systems with infinite-dimensional phase space</i>	291
Bloshanskii, I. L. <i>On the geometry of measurable sets in N-dimensional space on which generalized localization holds for multiple Fourier series of functions in L_p, $p > 1$</i>	87
Bogoyavlenskii, O. I. <i>Integrable Euler equations associated with filtrations of Lie algebras</i>	229
Bondarenko, L. N. See Zhuk, P. F.	
Budkin, A. I. <i>Quasivarieties of groups closed with respect to restricted wreath products</i>	503
Chistyakov, A. V. <i>Limit theorems for Markov processes in a rapidly changing random environment</i>	239
Dzhrbashyan, A. È. <i>Integral representations and continuous projections in certain spaces of harmonic functions</i>	255
Elizarov, P. M. and Il'yashenko, Yu. S. <i>Remarks on the orbital analytic classification of germs of vector fields</i>	111
Galaktionov, V. A. and Samarskii, A. A. <i>Methods of constructing approximate self-similar solutions of nonlinear heat equations. IV</i>	125
———. <i>Letter to the editor</i>	283
Ibragimov, A. I. <i>On some qualitative properties of solutions of elliptic equations with continuous coefficients</i>	447
Il'yashenko, Yu. S. See Elizarov, P. M.	
Karol', A. I. <i>Operator-valued pseudodifferential operators and the resolvent of a degenerate elliptic operator</i>	553
Krylov, N. V. <i>On degenerate nonlinear elliptic equations. II</i>	207
Kucherenko, V. V. and Osipov, Yu. V. <i>Justification of formal asymptotics of solutions for ordinary differential equations with degenerate symbol</i>	151
Lekishvili, M. M. <i>On the approximation of periodic functions by (C, α) means</i>	491
Liptser, R. Sh. and Shiryaev, A. N. <i>Weak convergence of a sequence of semimartingales to a process of diffusion type</i>	171
Makhnev, A. A. <i>On tightly embedded subgroups of finite groups</i>	515

Mamyan, A. Kh. <i>On some properties of the set of boundary value problems.....</i>	367
Markov, P. E. <i>Infinitesimal bendings of a class of multidimensional surfaces with boundary.....</i>	49
Mel'nikov, V. K. <i>Some new nonlinear evolution equations integrable by the inverse problem method.....</i>	461
Mikhailov, S. E. <i>On an integral equation of some boundary value problems for harmonic functions in plane multiply connected domains with nonregular boundary.....</i>	525
Mishchenko, S. P. <i>The Engel identity and its application.....</i>	419
Nguyen Min' Chyong [Nguyen Minh Chuong]. <i>On isomorphisms of Sobolev spaces of variable order.....</i>	1
Nikishin, E. M. See Aptekarev, A. I.	
Osipov, Yu. V. See Kucherenko, V. V.	
Pankov, A. A. <i>Bounded solutions, almost periodic in time, of a class of nonlinear evolution equations.....</i>	73
Pyatnitskiĭ, A. L. <i>Averaging a singularly perturbed equation with rapidly oscillating coefficients in a layer.....</i>	19
Samarskiĭ, A. A. See Galaktionov, V. A.	
Sevast'yanov, E. A. See Zhdanov, A. N.	
Shiryayev, A. N. See Liptser, R. Sh.	
Skubachevskii, A. L. <i>Nonlocal elliptic problems with a parameter.....</i>	197
Slepchenko, A. N. <i>On some generalizations of bases in Banach spaces.....</i>	269
Sverchkov, S. R. <i>On Jordan algebras that are solvable of index 2.....</i>	41
Turaev, V. G. and Viro, O. Ya. <i>Intersections of loops in two-dimensional manifolds. II. Free loops.....</i>	357
Vasil'ev, D. G. <i>Asymptotics of the spectrum of pseudodifferential operators with small parameters.....</i>	61
Viro, O. Ya. See Turaev, V. G.	
Zel'manov, E. I. <i>Lie algebras with an algebraic adjoint representation.....</i>	537
Zhdanov, A. N. and Sevast'yanov, E. A. <i>Approximation and differential properties of measurable sets.....</i>	401
Zhdanova, G. V. <i>Scattering of plane longitudinal elastic waves by a slender cavity of revolution. The case of axial incidence.....</i>	305
Zhuk, P. F. and Bondarenko, L. N. <i>On a conjecture of G. Forsythe.....</i>	427
Zhuravlev, V. G. <i>Hecke rings for a covering of the symplectic group.....</i>	379
